

# FALL LEAF WREATH

## SUPPLIES

- Paper in various colors
- Large paper plate or cardboard
- White glue
- Scissors
- String or ribbon

## DIRECTIONS

1. Create the wreath's round frame out of a paper plate by cutting a hole at the center of a large paper plate about 1" to 1½" wide.
2. Tie a length of string or ribbon around the frame.  
This will allow you to hang the wreath.
3. Make 20 or more paper leaves by folding paper in half and cut out half-a-leaf shape along the folded edge.  
Unfold the paper to reveal the leaf.
4. Glue each leaf onto the frame, overlapping the leaves as you go.
5. Fill the frame with leaves. Continue gluing the paper leaves until you've covered the entire frame.
6. To make a lush wreath, glue smaller leaves in between larger ones.  
Once happy with how your wreath looks, set it aside to dry.
7. Finally, hang your beautiful wreath!
