

PLAYER STATISTICS

HEY BATTER, BATTER

DIRECTIONS: Statistics are very important to batters. One of the most important statistics to a batter is his batting average. Use the formula below to figure out the average for these Snappers batters from the 2019 season.

$$\text{AVG} = (\# \text{ OF HITS} / \# \text{ OF AT BATS})$$

- A batting average is represented by a decimal carried out to three places, such as .300.
- Walks are not considered "At Bats" and therefore do not affect a batter's batting average.
- A good batting average is over .260. A great batting average is over .300.

<u>BATTER</u>	<u>HITS</u>	<u>AB'S</u>	<u>AVG</u>
Marcos Brito	37	204	_____
Nick Ward	68	293	_____
John Jones	71	298	_____
Anthony Churlin	85	328	_____
Nick Osborne	59	246	_____
