BALLPARK FACTS AND FIGURES

Riverfront Stadium is a new state-of-the-art venue along the banks of the Arkansas River in historic Delano neighborhood just south of downtown Wichita. The \$90 million stadium was built on the site where Lawrence-Dumont Stadium stood from 1934 to 2018.

The design-build team for the project includes a mix of national and local experts. DLR Group served as designer and baseball specialist; JE Dunn as lead design-builder along with local contractor Eby Construction; local firm PEC provided engineering services; and Wichita-based firm SCJF served as Architect of Record.

The stadium sits on 22 acres and accommodates more than 10,000 fans for a minor league baseball game, including more than 6,000 fixed seats and additional seating in berm, group party decks, and specialty areas for up to 4,000 spectators. Family-friendly amenities will include picnic areas, berm seating, a variety of terraced viewing spaces, and children-focused areas. Scattered throughout the park will be casual gathering spaces that will allow friends to gather and socialize while enjoying the game.

In addition to Wind Surge home games, Riverfront Stadium is a year-round facility designed to accommodate concerts, football, and soccer on the field and weddings and receptions, corporate trade shows, graduations, concerts, and various functions within the facility.

Adjacent to the ballpark will be a new Hall of Fame Museum that highlights the National Baseball Congress history in Wichita. The museum is slated to open in 2022.
