**Scorigami:** A portmanteau of score and origami, a scorigami is a scoring combination that has never happened before in a team, sport or league's history. The term was originated by SB Nation writer Jon Bois for NFL scores.

Above is a matrix of every final score that has happened in a Triple-A Omaha game <u>since 2000</u>. Green squares represent Omaha wins, while red squares represent Omaha losses. The number inside the square refers to the number of times that result has occurred. Empty squares represent a scoring combination or result that has not happened.

Since 2000, there are **58** results in Triple-A Omaha games that have only happened once. **34** of those results (wins or losses) are a true scorigami, a scoring combination that has only happened once. Recent scorigami occurrences are listed to the right, with true scorigamis in bold.
