

Three of Momentum Bank Ballpark's **premier sign locations** are unlike any other in the stadium - - **two stand-alone" signs & the pitch speed / game clock.**

## Stand-Alone Signs

- One in left field and one in right-center (see "A" and "B" in the photo, below)
- Both offer **exceptional size & visibility**
- Their size and placement allow visibility from all sections of the main seating bowl and the ballpark's "360" walkway (which circles the interior of the stadium)
- In addition, the sign marked position "A" is two-sided and is also visible from the stadium's parking areas and the Sports Complex Auxiliary Fields

## Pitch Speed / Game Clock

- Is positioned on the right-center field berm (see "C" in the photo, below)
- Has two digital readouts: The pitch velocity and the "game clock"
- **The pitch velocity readout is one of the most visible elements in the ballpark** It attracts the attention of both "serious" and casual fans
- The "game clock" serves multiple functions, including the "pitch clock" (One of the innovations designed to speed up pace of play) The "game clock" also counts down time between innings and ... before and after the game, the "clock is a clock," showing the time!

### Stand-Alone Sign

**\$16,500 per season**

Dimensions: 12' H x 16' W

### Pitch Speed / Game Clock

**\$16,500 per season**

Dimensions: 4½' H x 14½' W
